

LARRY'S ALBUM

Larry's album records the last vision of an ancient society that was to drastically alter its lifestyle, attitudes and characteristics in the mid-twentieth century under communist rule. L. Carrington Goodrich, an American, born in Tung chou, Northern China on 21st September, 1894 spent his formative years in close interaction with the Chinese people. He took it upon himself to portray the true face of China as against the oft depicted face of a land of dragons, dynasties and Ming vases. As China and Larry stepped from the nineteenth century into the twentieth century, he put together an album of the most comprehensive collection of photographs of China, its land, its people and culture. Larry's album was due to the efforts of unsung Western photographers who braved the dangers of an alien land to give us these first ever precious glimpses of an elevated and resplendent society.
